

SOCIAL CONNECT

Campaign Execution

Week 2: Content Creation, Channel Strategy, and Live Launch

Performance

Organic Content Output

A detailed presentation of Social Connect's organic publication pillars and operational copy execution.

Three Core Organic Pillars

Pillar 1: Interactive Carousel

Designed a swipeable Instagram gallery highlighting local hobby meetups, driving a massive 4.2% click-through rate.

Pillar 2: Peer Connect Show

Weekly mini-video series interviewing early campus adopters. Humanized the interface with raw and emotional stories.

Pillar 3: Ask Us Anything

Interactive Story Sticker Sessions focusing directly on community concerns. Handled customer trust factors openly.

Growth Loops & UGC Pillars

Pillar 4: Feature Focus Promo

Crafted static structural posts highlighting our "Local Discovery Map." Emphasized physical connection safety features, simple UI elements, and fast onboarding tracks. Visual designs utilized high-contrast deep blue and neon brand accents to maximize grid discoverability.

Pillar 5: UGC Launch – #MyTribe

Launched an influencer-driven organic trend encouraging users to share their niche community events. Incentivized participation with early-access beta invitations and free local event tickets, leading to rapid engagement spikes in metro test markets.

Paid Ads Creative Visuals

High-Conversion Ad Strategy

Designed and ran 2 unique mock ad sets aimed at our core segments via Meta Ads manager structure:

- **Creative 1 (The Campus Vibe):** Bright, relatable visuals depicting college freshmen finding local student-led study and sports groups.
- **Creative 2 (Relocation relief):** Focused heavily on young professionals moving to a new city, answering the pain-point: "How do I make real friends?"

Direct-to-User Email

Newsletter Nurturing

Drafted a focused direct email sequence targeting registered beta signups to activate daily active usage.

Subject: "Stop Scrolling. Start Connecting." The email highlights upcoming local events, a personalized peer suggestion algorithm, and straightforward calls-to-action to secure a community group.

Week 2 Campaign Launch Timeline

Day 3: Organic Push

Pushed early video and carousel pillars. Initiated the #MyTribe community hashtag loop.

Day 7: Moderation

Ran live story stickers. Solved signup friction points across active channels directly.

Day 1: Pre-Sync

Configured post queues in Buffer.
Synced asset libraries across marketing interns.

Day 5: Ad Deployment

Allocated test budgets to targeted student creatives. Monitored real-time cost-per-click.

Active Community Moderation

Active FAQ Bot

Engineered structured auto-responses and quick-replies to address standard questions about group filters and platform security.

Rapid Support

Reduced average comment-to-response lag to less than 2 hours. Successfully resolved several early sign-up errors directly.

Brand Integrity

Maintained high quality of community interactions by strictly filtering spam and checking that all public groups complied with standards.

Campaign Real-Time Traffic Results

Instagram Organic consistently drove our lowest cost-per-acquisition metrics, while Meta Paid Ads delivered the highest gross volume of signups within the test market.
