

WEEK 4

Advanced Marketing Techniques & Campaign Expansion

“Social Connect” App (Digital Marketing Internship Project)

Prepared for: **Pakistan-focused launch market**

Prepared by: Digital Marketing Intern

(All campaigns, ad spends, and analytics in this document are MOCK / simulated for internship purposes, no real ad spend used.)

Table of Contents

Campaign Context: Why This Approach

Week 4 shifts “Social Connect” from a single-channel pilot into a multi-channel growth push. The choices below (platforms, cities, influencer types, budgets) are grounded in Pakistan's actual 2026 digital landscape rather than generic assumptions, so the campaign reads as realistic and defensible in the final presentation.

Pakistan Digital Snapshot (2026)

- **Facebook** remains the largest platform by reach (approximately 68 million users, skewed 75%+ male, core age band 25–34), best for broad awareness and low-cost retargeting.
- **Instagram** has around 22–24 million users; younger and more urban (18–24 is the largest cohort) the primary home for lifestyle-influencer and Reels content.
- **TikTok** has the largest active 18+ audience in the country (high-70s to 80 million) critical for short-form, challenge-style virality.
- **WhatsApp** functions as the “conversion layer” in Pakistan not for discovery, but for closing the loop (sharing invite links, confirming sign-ups).
- **Average Google Ads** CPC in Pakistan ranges roughly PKR 20–600 depending on competition, with search CPC commonly landing near PKR 80–250 for consumer apps and CPI (cost-per-install) benchmarks of \$1–\$5 internationally.

Target Audience for Week 4 Activities

Attribute	Definition
Age	18–30, primary focus 18–24 (largest Instagram/TikTok cohort)
Location	Karachi, Lahore, Islamabad, Rawalpindi, Faisalabad (highest smartphone + 4G/5G penetration)
Behavior	Active on Instagram Reels, TikTok, and Facebook groups; comfortable with bilingual Urdu/English content
Motivation	Wants to meet people with shared interests, join communities, and use a safer alternative to generic chat apps

Task 1 — Influencer and Partnership Outreach

Rather than inventing fictional creators, this shortlist uses real, currently active Pakistani creators across the two niches named in the brief — lifestyle and tech — so outreach can begin immediately. Follower counts fluctuating monthly, so the list deliberately uses tiers (Macro: 500K+, Mid: 50K–500K, Micro: 10K–50K) instead of frozen numbers; confirm exact current stats via the platform or a tool such as Hype Auditor/Favicon before sending outreach.

1.1 Shortlist: 8 Influencers Across Two Niches

Creator	Niche / Platform	Tier & Audience Fit	Why They Fit Social Connect
Ukhano	Tech — YouTube, Instagram	Macro: Gen Z tech audience nationwide	Reviews everyday gadgets and apps in relatable Urdu/English; ideal for an honest “first impressions” app walkthrough
Umer Khan	Tech — YouTube	Mid–Macro: mainstream gadget buyers	Known for making new tech accessible to a non-technical audience, good fit for explaining app features simply
Asad Ali TV	Tech — YouTube (Faisalabad)	Macro: Urdu-first, smaller-city reach	Posts almost daily in plain Urdu, reaching tier-2 cities the campaign would otherwise miss
Mr. How	Tech tips/how-to — YouTube	Mid: practical, tutorial-seeking audience	Audience already watches step-by-step app/tech tutorials, natural fit for an “how to use Social Connect” video
Rabia Faisal (Sistrology)	Lifestyle/beauty — YouTube, Instagram, TikTok	Macro: youthful, female-skewed	Established brand-collaboration history; strong fit for a lifestyle “day in my life using the app” integration
izaynab.sultan	Lifestyle — Instagram	Mid: engaged Pakistani lifestyle audience	Ranks among Heepsy's top Pakistani lifestyle accounts, strong Reels engagement for a sponsored post/Story
Zahra Naveed	Lifestyle — Instagram	Mid: similar audience to above	Same niche, different aesthetic, useful for A/B testing creative approach across two similar-tier creators
Iqra Kanwal & Sisters	Family/lifestyle (YouTube, TikTok)	Macro: broad, multi-generational reach	Relatable “family group chat” framing fits a social app; strong organic engagement on everyday-life content

1.2 Outreach Message Drafts

Three templates covering the three realistic response paths: a paid micro/mid-tier collab, a barter/affiliate offer for a tech reviewer, and a formal email for a creator with a management team.

Template A — Instagram/TikTok DM (Lifestyle Creator, Paid Collab)

Hi Merium Pervaiz, hope you're doing well! I'm reaching out from Social Connect, a new app that helps people meet others who share their interests. We love how authentic your content feels and think your audience would relate to it. We'd love to send you early access and discuss a paid collaboration, a short Story series or Reel sharing your honest experience. Open to hearing your rate and content style preferences. Would you be free for a quick call this week?

Template B — Email (Tech Reviewer, Barter/Affiliate Offer)

Subject: Collaboration Opportunity Social Connect App x [DirectorAi@microsoft]

Dear Hamza chishtie, We're part of the launch team for Social Connect, a new Pakistani social networking app focused on helping users find communities around shared interests. Your reviews are trusted by exactly the kind of audience we're trying to reach, and we'd love to send you the app for an honest first-look review or app walkthrough. We can offer a flat collaboration fee plus a unique referral/affiliate link so you also earn from sign-ups your audience generates. Happy to share the media kit and full brief if you're interested — would love your thoughts. Best regards, [Your Name] Digital Marketing Team, Social Connect

Template C — Formal Email (Macro Creator with Management/Agency)

Subject: Brand Partnership Inquiry for Social Connect App

Hello, I'm reaching out on behalf of Social Connect regarding a potential paid partnership with [Creator Name]. We are looking for one to two pieces of integrated content (Reel or YouTube segment) introducing the app to their audience, alongside a tracked promo code for performance reporting. Could you share your current rate card and availability over the next two weeks? We're happy to work around your existing content calendar and provide full creative freedom within brand guidelines. Looking forward to hearing from you. Warm regards, [Your Name] Social Connect Marketing Team

Task 2 — Search Engine Marketing (SEM)

This is a mock Google Ads Search campaign (no real spend). Budget and CPC figures are anchored to 2026 Pakistan benchmarks: Search CPC commonly falls between PKR 20–600, with consumer/app categories typically nearer PKR 80–250 per click, and app CPI benchmarks of roughly \$1–\$5.

2.1 Mock Campaign Structure

Setting	Value
Campaign name	Social Connect — Search — App Installs — PK
Campaign type	Search Network (mock; in production this would run alongside a Google App Campaign)
Objective	App installs / landing-page conversions
Locations	Karachi, Lahore, Islamabad, Rawalpindi, Faisalabad
Languages	English + Urdu
Devices	Mobile only (bid adjustment: +20%)
Age / Gender	18–30, all genders
Daily budget (mock)	PKR 4,000– 5,000 per day (≈ PKR 120,000–150,000/month test budget)
Bidding strategy	Maximize Conversions, with a Target CPA cap once 30+ conversions are logged
Ad extensions	Sitelinks (Features, Reviews, Download), Callout (“Free to Join”, “Verified Profiles”), App link extension

2.2 Target Keywords

Keyword	Match Type	Intent	Est. CPC (mock)
social networking app Pakistan	Phrase	High	PKR 90–150
best app to make new friends	Phrase	High	PKR 80–130
chat and connect with friends app	Broad	Medium	PKR 60–100
Social Connect app download	Exact	Very High (brand)	PKR 20–40
new social media app 2026	Broad	Medium	PKR 70–120
meet new people online Pakistan	Phrase	High	PKR 100–160

CPC figures are mock estimates derived from published Pakistan Google Ads benchmarks, not live auction data.

2.3 Ad Variations (Responsive Search Ad copy)

Ad Variation 1: “Belonging” angle

Headline 1: Connect With Real People

Headline 2: Social Connect – Free App

Headline 3: Meet, Chat, Share Daily

Description 1: Join thousands of Pakistanis already connecting daily. Download Social Connect free today.

Description 2: Find people who share your interests. Available now on Android and iOS.

Ad Variation 2 — “Safety + Simplicity” angle

Headline 1: Make New Friends Easily

Headline 2: Social Connect App – Free

Headline 3: Chat. Connect. Belong.

Description 1: A safe space to meet new people across Pakistan. Download now and start connecting.

Description 2: Verified profiles, group chats, and more. Get the app on Play Store today.

Ad Variation 3 — “Urgency / FOMO” angle

Headline 1: Download Social Connect Now

Headline 2: Pakistan's Newest Social App

Headline 3: Your Community Awaits

Description 1: Thousands are already connecting. **Don't miss out , install Social Connect free today.**

Description 2: Available in Urdu and English. **Tap to download and join the community.**

Task 3 — Social Media Growth Strategies

Engagement formats below were chosen because they map to proven Pakistani social behavior: tag-a-friend contests and “This or That” polls consistently outperform static posts on Instagram/Facebook in the region, and 7-day challenges translate well to TikTok/Reels.

3.1 Engagement Campaign — “7-Day Connect Challenge”

- Format: A daily prompt for 7 days (Instagram Stories + TikTok), e.g. Day 1 — “add one new interest to your profile”, Day 4 — “start a chat with someone new”, Day 7 — “share your Social Connect story.”
- Mechanic: Each completed day unlocks a shareable sticker/badge users post to their own Story, tagging @SocialConnect — built-in virality loop.
- Incentive: Top 10 most-shared completions win mobile credit / app merchandise.

3.2 Engagement Campaign — Poll Series

- Format: Daily Instagram/Facebook sticker polls over one week, e.g. “How do you prefer to meet new people — shared interests or random match?”
- Purpose: Doubles as lightweight product research while keeping the account active in followers' Stories tray (a low-cost, high-frequency engagement tactic).

3.3 Two Additional Interactive Posts

Post A — “This or That” Carousel Poll

Caption: “How do YOU like to make new friends? 🗳️ Vote in our poll and tell us why in the comments! A) Matched by shared interests B) Total random connection. Tap the link in bio to try both on Social Connect.”

Post B — UGC Challenge Post

Caption: “Show us your #SocialConnectStory! 🌟 Post a Reel about how you made a friend on the app and tag us — our 3 favourites get featured on our page + a free month of premium features. Challenge ends Sunday!”

Task 4 — Retargeting Ads

Retargeting is the highest-ROI tactic in this plan because every audience segment below has already shown intent — they cost less to convert than cold traffic. Segments are built around realistic event tracking (landing page, app-store click, in-app activation event).

4.1 Mock Retargeting Audience Segments

Segment	Trigger Event	Why Target Them
Landing page visitors, no click	Visited site/landing page, 30-day window, did not click “Download”	Warm traffic that needs one more nudge — cheapest segment to reconvert
App-store click, no confirmed install	Clicked through to Play Store/App Store but no install event fired	Likely hesitated at the store listing — reassurance messaging helps
Installed, profile incomplete	App opened once, in-app “profile complete” event not fired within 3 days	Activation, not acquisition, is the blocker — message should drive completion, not re-download
50%+ video viewers, no click	Watched 50%+ of promo video on Meta/YouTube, did not click through	High-intent viewers who simply didn't act yet

4.2 Retargeting Ad Creatives

Creative 1 — “Still Thinking About It?” (targets: landing page + app-store segments)

Visual: phone mockup of the app home screen with sample friend/interest suggestions.

Copy: “Your community is waiting. Download Social Connect now and start connecting in seconds.”

CTA button: “Download Now”

Creative 2 — “You're Just One Step Away” (targets: incomplete-profile segment)

Visual: progress bar graphic showing a 90%-complete profile.

Copy: “Finish setting up your profile to unlock matches and groups picked just for you.”

CTA button: “Join the Community”

Task 5 — Content Distribution

Each platform gets a distinct angle rather than the same post copy-pasted everywhere — LinkedIn skews professional/B2B, Reddit rewards genuine discussion over promotion, and X/Twitter favors concise, threaded takes.

5.1 Repurposing Matrix

Original Asset	LinkedIn Angle	Reddit Angle	X (Twitter) Angle
IG Reel: “5 Ways to Make Friends Online Safely”	Article: “The Psychology of Digital Friendship — What Social Apps Get Right” (thought-leadership for a professional audience)	Genuine discussion post in a relevant community: “What do you actually look for in a social app?” with a soft, rules-compliant mention	5-tweet thread breaking down the safety tips, one per tweet
Influencer collaboration video	Case-study style post on the partnership and early results (marketing-audience angle)	N/A — self-promotional collab content is generally against most subreddits' rules	Quote-tweet/retweet of the creator's post with a short brand comment
Poll-results graphic	Carousel post sharing the community insight (e.g. “62% of users prefer interest-based matching”)	Data-driven discussion post asking the community to react to the finding	Single tweet with the stat + graphic

Note on Reddit: most subreddits restrict direct self-promotion. The Reddit-column posts are framed as genuine discussion starters, not ads, and should follow each subreddit's specific self-promotion ratio rules.

5.2 Week 4 Content Calendar

Day	Platform	Content	Format	Owner
Mon	Instagram	Influencer collab teaser (Sistrology)	Reel	Content Lead
Tue	Google Ads	Launch Search campaign, Ad Variation 1 live	Search ad	SEM Lead
Wed	Instagram/FB	Poll Series — Day 1	Story poll	Social Lead
Thu	TikTok	7-Day Connect Challenge — Day 1 prompt	Short video	Social Lead
Fri	LinkedIn	Repurposed article: digital friendship psychology	Article	Content Lead
Sat	Instagram	UGC Challenge post (#SocialConnectStory) launch	Carousel + Reel	Social Lead

Sun	Retargeting (Meta/Google)	Creative 1 — “Still Thinking About It?” goes live	Display/Feed ad	Performance Lead
-----	---------------------------	---	-----------------	------------------

5.3 Monitoring: KPIs & Tools

Metric	What It Tells Us	Tracking Tool (mock)
CTR (Search + Social ads)	Whether ad copy/creative is compelling enough to earn a click	Google Ads dashboard, Meta Ads Manager
CPI (Cost per Install)	Efficiency of paid spend at driving actual installs	Google Ads / Meta Ads conversion reporting
Engagement rate (likes, comments, shares, poll votes)	How well organic content resonates	Meta Business Suite Insights, TikTok Analytics
Link clicks (bio link, UTM-tagged)	Which platform/post is actually driving traffic	Bitly/UTM parameters + Google Analytics
Profile-completion rate	Whether retargeting Creative 2 is fixing the activation drop-off	Mock in-app analytics (Firebase-style event)

Week 4 Deliverables Checklist

1. Influencer shortlist (8 creators) + 3 outreach message templates (Section 1)
 2. Mock Google Ads Search campaign: structure, 6 keywords, 3 RSA ad variations (Section 2)
 3. Two engagement campaign concepts (challenge + poll series) and 2 interactive social posts (Section 3)
 4. Mock retargeting campaign: 4 audience segments + 2 conversion-focused ad creatives (Section 4)
 5. Content repurposing matrix (3 assets × 3 platforms) + 7-day content calendar + KPI tracking plan (Section 5)
-
