

WEEK 5

Data Analysis & Community Building

“Social Connect” App — Digital Marketing Internship Project

Prepared for: Pakistan-focused launch market

(All analytics, testimonials, and email metrics are mock, practised for research as requirement of internship)

Task 1 — Deep Dive into Analytics

This section consolidates performance from the Week 4 push (influencer collabs, SEM, social growth campaigns, and retargeting) into a single analytics view. Figures are mock/simulated but built on realistic 2026 platform benchmarks (Instagram organic ER $\approx 0.5\text{--}3.5\%$, TikTok $\approx 3.5\text{--}4.5\%$, Facebook organic $\approx 0.02\text{--}1\%$) so the shape of the data — not just the numbers — is defensible.

1.1 Audience Demographics

Audience Age Distribution

- 18–24 is the largest segment (42%) — consistent with Pakistan's overall Instagram/TikTok user base and slightly amplified here by the lifestyle-influencer and challenge-format content.
- Gender split sits at roughly 61% male / 39% female across all channels combined, mirroring national platform-level skew; the Sistrology and lifestyle-influencer collabs are the main lever already narrowing this gap.

1.2 Platform-Wise Performance

- TikTok delivers the highest engagement rate (4.5%) despite lower reach than Instagram — the 7-Day Connect Challenge format is overperforming relative to its audience size.
- Facebook reach is the second-largest (180K) but engagement rate is lowest (1.0%) — expected, since Facebook is functioning as a broad-awareness layer rather than a content-engagement one (see Task 4: Content Optimization).
- LinkedIn is smallest in raw reach (40K) but punches above its weight on engagement (3.2%), validating the repurposing strategy from Week 4 Task 5.

1.3 Daily Installs Trend

- Installs grew steadily through the week (320 → 610) as SEM and the TikTok challenge ramped up, then spiked sharply on Saturday (890) when the UGC challenge and the Sistrology collab post went live simultaneously.
- Sunday's small dip (760) while still elevated suggests the retargeting creative is successfully capturing users who didn't convert during Saturday's peak — a good early signal for Task 4 below.

1.4 Best-Performing Content

Three clear patterns emerge from the top 5:

1. Influencer-led content outperforms brand-only content — the Sistrology Reel (6.8% ER) and the Asad Ali TV review (5.2% ER) both beat every brand-owned post.
2. Video beats static almost everywhere — four of the top five pieces are video-first formats (Reels/short-form), consistent with the 2026 benchmark that Reels outperform static posts by roughly 80–120%.
3. UGC is a legitimate top-tier format, not just a community nice-to-have — the UGC Challenge compilation Reel (5.9% ER) outperformed every paid ad creative.

Task 2 — Engagement and Community Building

2.1 Mock Live Q&A Event

Detail	Value
Platform	Instagram Live
Title	“Ask Us Anything: Making Friends Online Safely”
Date / Duration	Saturday, 45 minutes
Peak concurrent viewers	410
Replay views (48 hrs post-event)	2,300
New sign-ups attributed within 48 hrs	≈140 (tracked via a dedicated promo code shared live)
Top discussion topics	Profile safety settings, how interest-matching works, verification badges

Mock figures, modelled on typical Instagram Live attendance-to-replay ratios for a mid-sized brand account.

2.2 Testimonial Collection Campaign

Call-to-action used: “Share your Social Connect story for a chance to be featured — tag us or DM your experience.” Below are three illustrative (mock, non-real-user) testimonials representative of the tone and content the campaign aims to collect:

“I moved to Lahore for university and didn't know anyone outside my department. Found a whole group of people into photography through Social Connect within two weeks.” — Mock user testimonial, Lahore

“What I liked is that it didn't feel random — the people I matched with actually shared my interests, so conversations didn't die after hello.” — Mock user testimonial, Karachi

“The verified-profile badge made me feel a lot more comfortable accepting chat requests from strangers.” — Mock user testimonial, Islamabad

These are illustrative placeholder quotes written to show the tone and angle to collect — they should be replaced with real, consented testimonials once the campaign runs live.

Task 3 — Email Marketing: 3-Email Drip Campaign

Built as a mock Mailchimp-style automation triggered on app install, targeting download-to-activation and early retention. Benchmarked against 2026 Software/Tech industry norms (~30–36% open rate, mid-single-digit CTR), with the expected natural decline across a drip sequence.

3.1 Email 1 — Welcome (Day 0)

Subject line: “Welcome to Social Connect 🙌 Let's find your people”

Hi [First Name],

Welcome aboard! Social Connect helps you meet people who actually share your interests — no random swiping, no awkward small talk required.

Here's how to get the most out of it in your first 5 minutes:

1. Finish your profile and add 3+ interests
2. Browse your first set of suggested connections
3. Send your first message — we'll suggest an icebreaker if you're stuck

[[Complete My Profile →](#)]

See you inside,

The Social Connect Team

Mock result: 38% open rate, 6.2% CTR — highest of the sequence, consistent with welcome emails reliably outperforming every later send.

3.2 Email 2 — Feature Highlight / Social Proof (Day 3)

Subject line: “👥 You're missing out on Groups (here's who's already in one)”

Hi [First Name],

Did you know over 60% of active users have joined at least one interest-based Group? Groups are where the real connections happen — book clubs, gaming squads, fitness crews, and more.

“Found a whole group of people into photography within two weeks.” — a Social Connect user in Lahore

[Browse Groups Near Me →]

Talk soon,

The Social Connect Team

Mock result: 31% open rate, 4.8% CTR — social proof line is doing the work of holding CTR up despite the natural open-rate decline.

3.3 Email 3 — Win-Back / Retention (Day 7)

Subject line: “We saved your spot — 3 people want to connect with you”

Hi [First Name],

It's been a week and your profile already has some interest — 3 people who share your interests have viewed your profile.

Jump back in and see who's there. It only takes a minute.

[See Who's Interested →]

We'd love to have you back,

The Social Connect Team

Mock result: 24% open rate, 3.1% CTR — lowest of the sequence, as expected for a Day-7 win-back; still above the cross-industry blended average (≈19% open / 2.4% CTR), suggesting the sequence is performing reasonably well even at its weakest point.

Task 4 — Content Optimization

4.1 Underperforming Content Review

Content	Metric (mock)	Issue Identified	Suggested Fix
Facebook static post — feature list graphic	0.3% engagement rate	Text-heavy image, no clear single CTA, posted on Sunday (lowest-engagement day)	Convert to a 15–30 second Reel/video repost; one CTA only; reschedule to Tue–Thu morning
Generic Google Display ad (broad audience)	0.4% CTR, high CPI	Targeting too broad; irrelevant placements diluting spend	Narrow to the retargeting list only (see Week 4, Task 4); switch creative to an app-screenshot carousel
Early Instagram carousel — “5 Reasons to Join”	1.1% engagement rate, low saves	Listicle format reads as an ad, not a story; weak visual hook on slide 1	Lead with a relatable scenario/hook in slide 1; end with a UGC-style “tag a friend” CTA

4.2 A/B Test — Retargeting Creative “Still Thinking About It?”

Hypothesis: a short video version of the retargeting creative will outperform the static-image version, consistent with the broader 2026 benchmark that video/Reels formats beat static content by roughly 80–120% on engagement.

	Variant A — Static Image	Variant B — Short Video
Format	Phone mockup + headline graphic	6-second looping clip of the app's friend-suggestion screen
CTR (mock)	2.1%	3.9%
CPI (mock)	\$3.40	\$2.10

A/B Test — Retargeting Creative “Still Thinking About It?”

Result: Variant B (short video) wins on both CTR and cost-efficiency. Recommendation: shift 100% of retargeting budget to the video variant for Week 6, and apply the same static-vs-video test to the SEM ad variations next.

Week 5 Deliverables Checklist

4. Mock analytics report with visual charts: audience demographics, platform-wise performance, daily installs trend, top 5 content — Section 1
 5. Mock Q&A/live event recap + testimonial collection campaign with 3 illustrative testimonials — Section 2
 6. 3-email drip campaign (Welcome, Feature Highlight, Win-Back) with full copy and mock performance — Section 3
 7. Underperforming-content review (3 items) + 1 completed A/B test with a clear winner and recommendation — Section 4
-
