

Week 1 Digital Marketing Campaign Plan for Social Connect App

Week 1: Research & Planning

Social Connect--Campaign Strategy

Market Research Task 1 of 3

Target Audience

Primary age group	Secondary age group	Geography
18-30	30-45	Urban
Gen Z & younger Millennials	Older Millennials	Tier 1 & 2 cities

Interests & psychographics

Social networking	Content creation	Tech-savvy	Remote workers / students
Influencers & creators	Community building		

Pain points addressed by Social Connect:

- Fragmented social platforms
- Lack of meaningful connections
- Difficulty discovering niche communities
- Privacy concerns on mainstream apps

Competitor Analysis

Competitor	Strength	Weakness	Strategy used
Instagram	Visual content, huge reach	Algorithm-heavy, low organic reach	Reels, influencer collabs
Discord	Niche communities	Steep learning curve	Server partnerships, events
LinkedIn	Professional networking	Limited casual use	Thought leadership, articles
Meetup	Real-world events	Outdated UI, low retention	Email newsletters, SEO

Our differentiator

Social Connect bridges casual socializing with meaningful community building, positioned between Instagram's breadth and Discord's depth, with a cleaner onboarding experience than both.

Recommended Marketing Channels

Instagram	Reels, Stories, influencer seeding (best for visual brand awareness)
TikTok	Short-form video virality (ideal to reach Gen Z audience quickly)

LinkedIn	Thought leadership posts targeting professionals & remote workers
Google Ads	Search + display ads targeting "social networking apps" keywords

Primary channel recommendation

Lead with **Instagram + TikTok** for awareness (organic + paid), use **LinkedIn** for credibility, and **Google Ads** for intent-driven installs. Facebook optional as retargeting layer.

Campaign Goal Setting (Task 2 of 3)

SMART Goals

Specific: Promote the Social Connect app to urban 18–35 year olds via Instagram, TikTok & LinkedIn with targeted ad creatives and organic content.

Measurable: Achieve 500 app downloads, 20% increase in brand awareness (tracked via reach & impressions), 5% engagement rate on posts.

Achievable: Realistic for a 3-week campaign using a mix of organic content (5+ posts) and a mock/small-budget paid ad campaign on 2 platforms.

Relevant: Directly supports the app's growth goal of expanding its user base and increasing visibility among the target demographic.

Time-bound: All goals to be achieved within the 3-week campaign window (Week 1 planning, Week 2 execution, Week 3 analysis).
